

Discover the 4 SEASONS with the WINGED MULTICLEARER!

Hauer Metall-Technik GmbH

QUALITY that endures!

AREAS OF USE:

Snow *

Hailstones *

Mud *

Gravel *

Compost, manure *

Wood chips *

Waste, refuse *

Silage *

Animal feed *

Sand *

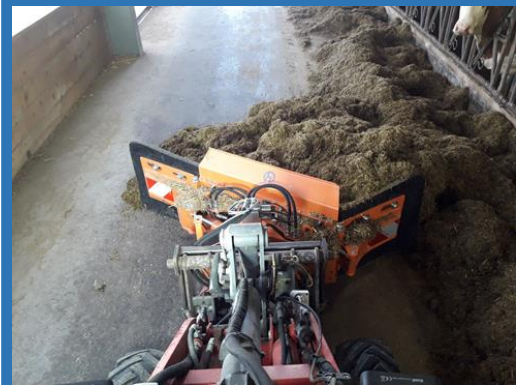

ADVANTAGES:

- Manoeuvrable: Infinitely variable pivoting of base support and side wings
- Efficient: No “loss” of snow at the sides and thus no need for frequent reversing – which **saves time & fuel**
- Low-noise: Ideal in noise-sensitive zones such as health resorts and hospitals, schools, residential areas and tourist areas
- Ground-friendly: No “ripping out” of paving and curb stones
- Vehicle-friendly: Double shock valve – no getting stuck on manhole covers
- Flexible: Infinitely variable pivoting of base support and side wings
- Powerful: Quality-guaranteed materials and workmanship
- Vehicle-matched: Available in widths 1.4m to 4.6m
- Guaranteed delivery times: Made in Austria
- Durable: Quality of the highest level

With the Winged Multiclearer, **save time = save fuel**

WINTERS are unpredictable and the amount of snow as well. Even with low snowfall, it's essential to ensure that footpaths and cycle tracks, squares and streets are cleared! Slushy, wet snow due to the lower temperatures isn't uncommon – and ideal conditions for the Winged Multiclearer with its side wings, which are individually infinitely adjustable. Parked cars and narrowed driving widths are no problem with the WINGED MULTICLEARER!

STORMS are unfortunately becoming more frequent! The WINGED MULTICLEARER is ideal for clearing hailstones, mud, gravel, branches and water from streets and squares.
